

GENESYS 3.0 Service Pack 2

15 July 2014

To best serve our user community, Vitech releases a service pack 30 days after product launch with subsequent service packs released every 45 days thereafter. Service packs contain bug fixes and minor capability enhancements. Resolved bugs are grouped by area with a brief description of the main symptom observed.

This second service pack includes several enhancements alongside several corrections, most of which are minor. Of greatest interest are enhancements improving the maintenance of style and layout during diagram manipulation and adding the 'All relationships' option to entity property views. Additionally we have a fix to save edited Notes.

Given these corrections and the three new enhancements, Vitech Corporation recommends that GENESYS 3.0 users install this service pack. However, if deploying service packs within your organization is difficult, you should review the issue descriptions below to see if they impact you. If none of the issues are of interest, you may wish to bypass this service pack.

We will continue to incorporate capability enhancements throughout the service pack cycle. Many of these are driven by user suggestion, so we encourage you to share your ideas with us at support@vitechcorp.com or on the community site at community.vitechcorp.com.

This service pack is cumulative and includes all changes released in Service Pack 1. Unless otherwise noted, the installation of SP2 is the only action required to resolve the problem.

SBI#	GENESYS 3.0 SP2 – Resolved Description / Notes
Enhancements	
1	'All relationships' option added in the relationships pane to quickly list/access all the relations of the entity under consideration.
2	Transforms icon added to the ribbon in the Diagram tab. This provides the user with the following functionalities: Mirror on the X (or) Y axis, Rotate 90°, Special edge routing. This feature is available for all free-form diagrams: Spider, Interface Block, Internal Block, Physical Block, and State Transition.
3	A 'Use Orthogonal Lines' option added for the free-form diagrams which will ensure the connection edges maintain their orthogonal layout. With this option selected the node connections maintain their orthogonal layouts even when nodes are moved around.
General	
8164	The GENESYS window could not be moved by clicking and dragging when it was at maximum size.
8217	Removed unused dialog box launchers from Diagram ribbon.
8053	Added the names of any missing attributes that result in conflicts during Import to the conflict messages in the Import /Export wizard.
Diagrams	
8236	Edits to Note and shape text were not getting saved.

SBI#	GENESYS 3.0 SP2 – Resolved Description / Notes
8213	Error: “Value cannot be Null” when using F5 to refresh diagrams.
8170	Adding an exit to the diagram opened a multi-select dialog.
Permissions	
8239	Error: “User does not have sufficient privileges to update this folder” when a user with insufficient permissions tried to move a folder.
8241	Project property controls appeared enabled when a user had "read only" permissions.
Project/Data	
8183	Dynamic updates not enabled when automatic color option was selected.
8223	The in-dent and out-dent icons on rich text box editors did not match windows standard.
8240	Node image disappeared when other properties were changed.
8246	Format options for Reports in rich text controls were not getting saved.
8222	Error: “Cannot be an empty Guid” when the description field of a script selected in a script spec was modified and closed.
8221	The Undo/Redo icon is disabled after deleting an entity from the relationship browser.
Sample Files	
8151	RTF and non-RTF fields in the sample files were not using the same fonts.
8192	Error: “Exception has been thrown by the target of an invocation” in accessing “JTF to BGE Intel” interface entity in Sample: Tactical Image Management (DoDAF v2.0).
8181	Error: “GENESYS services encountered a problem while processing your request.” when turning on versioning for Sample: Tactical Image Management (DoDAF v2.0).
Schema	
8178	Renamed the consistency checker in schema mode to include the word 'Schema' to avoid confusion with the database diagnostics.
8189	When merging two schemas where the importing schema class change contained a different set of attributes than the current schema, the attribute order was not imported and merged.
Session	
5595	The session limit error messages needed to be modified to make them more explicit.

Changes Included in Service Pack 1

Service Pack 1 includes a number of bug fixes to improve the user experience and consistency of the GENESYS application. Resolved bugs are grouped by area and include a brief description of the main symptom observed. Unless otherwise noted, the installation of SP1 is the only action required to resolve the problem.

SBI#	GENESYS 3.0 SP 1 – Resolved Description / Notes
General	
8167	External File Path hyperlink goes offline when you click off the entity and come back.
8106	Entity attribute value editors with focus cannot receive a version update.
8103	Parameter definition names with double opening ('[[') or double closing (']]') brackets in them are not being detected as invalid.
8153	Registration - Name field does not allow apostrophe (') as a valid character.
8112	System Tray - When GENESYS 3.0 detects an existing GENESYS System Tray application running, it does not start and no information is provided to help the user identify or resolve the issue.
8111	System Tray - there is no way to distinguish between GENESYS 2.0 and GENESYS 3.0 system tray applications running in the system tray.
8113	System Tray - GENESYS 3.0 System Tray will not start if GENESYS 2.0 System Tray is running
DOORS Connector	
8099	During import into GENESYS, entities with Object Text as Names are created instead of using default names. This could cause naming conflicts.
8101	The GENESYS ID and name fields are not being reflected in the DOORS module after export.
8109	Allocated to Component field not getting updated in DOORS after export.
8110	Unformatted DOORS module is receiving the GENESYS data during export.
8174	GUID, name, and relationships data not getting updated in DOORS after export.
Diagrams	
Enhancement	Hierarchy and Spider Diagram - Add “show relationships” as a diagram-level option for spider and hierarchy diagrams.
8126	General - When editing text in Notes or Shapes, the cursor is not placed in the text area by default.
8114	General - Double-clicking a class in the diagram tool box “All Entities” tab does not create a new entity.
8122	Requirements Diagram - Missing Document class in Key Entities.
7659	Hierarchy and Spider Diagram - Choosing a spider or hierarchy view for a Requirement entity throws an error.
8162	Hierarchy - Add show relationships as a diagram level option.
8171	If a user tries to delete an essential Node template, the message should be worded consistently with other informational messages and not contain the word Error.
8177	State Transition - When connecting states via a transition, a Null reference exception – “Object reference is not set to an instance of an object” occurs.

SBI#	GENESYS 3.0 SP 1 – Resolved Description / Notes
8072	State Transition – Node Template is not updating when adding new incorporates targets.
8160	State Transition - Events of type “Signal” should not display parentheses unless a condition is specified.
8161	State Transition - Removing a transition causes error “Value cannot be null.”
8097	State Transition - Nodes should have edge connected to center by default to improve default edge and label placement if node is moved.
Excel Connector	
Enhancement	The Excel connector displays relationship targets separated by commas; changed to display them separated by line feeds for readability.
Licensing	
7913	Activation Wizard Step 5 message "Please wait... You will be notified when the activation is complete" is shown before user selects activate.
Project/Data	
2081	Disable OK button when there is no text in the Name field for a new project.
8184	Entity properties sheet / Property tab - dynamic update not occurring when Node Image deleted.
8190	Entity properties sheet / Property tab – provide message when user tries to delete the node image if the image is the default image.
8107	IValueEditor - Unexpected behavior when an IValueEditor control is in an invalid state.
6019	Project Explorer – Moving entities between folders appears slow.
6697	Ribbon - Text Color and Highlight buttons appear active when no text is selected.
Reports	
7555	When creating a report in the report designer with a report parameter to be multi-select, the objects are not being picked up by the reporting framework after being selected by the user.
Scripting	
8127	When adding an assembly reference to a script get error “Value cannot be null.” NOTE: Adding script assemblies to a GENESYS script has some limitations such that not just any assembly can be added to a GENESYS script. One must consider version, platform, and valid .NET assemblies.
8128	Unhandled error “The path is not of a legal form” occurs when trying to remove a script reference.
8116	Script browser dialog tree may display scripts from more than one repository.
8115	Script browser window throws error “Unable to get repository. You must log into the repository first.” if a prior repository had been opened.

SBI#	GENESYS 3.0 SP 1 – Resolved Description / Notes
8102	ScriptReferenceSelectionDialog throwing error “Unable to get repository. You must log into the repository first.” when accessing repositories.
Sessions	
8096	When exiting GENESYS 3.0 with the Stop Windows Service box checked, the GENESYS service (Genesys3collaborativeSvc) is not getting stopped.
Simulation	
8149	Closing the simulator after a script error causes error “There are no scripts to compile; The script assembly was not created.”
8084	When saving the timeline in a simulation, get error “Not enough memory for temporary image.”
