

# GENESYS 6.0 Service Pack 1

15 June 2018

In order to best serve our user community, Vitech releases the initial service pack 30 days after product launch, with subsequent service packs released every 45 days thereafter, to resolve errors identified and add minor capability enhancements.

In the table below, the fixed bugs are grouped by area with a description of the main symptom observed. While we believe the likelihood of most users being impacted by these issues is low, it is recommended that you install this service pack, assuming the service pack deployment within your organization is reasonable.

We like to incorporate capability enhancements throughout the service pack cycle. We hope you will share your ideas with us by emailing our Customer Support Team at [support@vitechcorp.com](mailto:support@vitechcorp.com).

Unless otherwise noted, the installation of Service Pack 1 is the only action required to resolve the problem.

Reference	Description / Resolution Notes
<b>Enhancements</b>	
Performance improvements	Increased the performance in retrieving entity lists throughout the tool. This includes browsing, target lists, searching, and running reports such as TeamView.
<b>Connectors</b>	
Last login information not saved (11560)	When connecting to a remote repository, the login information (repository and user name) is not remembered across sessions.
PowerPoint missing some diagrams (11729)	Some diagrams are not being imported into PowerPoint (e.g., Requirements diagram when a Document was selected).
<b>Locking</b>	
Lists of entities are pre-filtered (11748)	When viewing a list of entities, if locked entities are not appropriate, the locked entities are not shown. This could lead to some confusion.
<b>Search</b>	
Escaped wildcard not highlighting (11724)	When using an escaped wildcard (e.g., \*) with whole word selected, the character is not highlighted correctly.
Remembering include children option (11723)	The "Include Children" option is not remembered from search to search.
<b>Reports / Report Editor</b>	
SDD figure captions (11699)	Figure captions are captured inconsistently.
SDD subgroups included in TOC (11700)	The subgroupings of output in the following sections are included in the TOC: Use Cases, States & Modes, Functional Behavior Model, Components, Interfaces & Links.

Reference	Description / Resolution Notes
<b>Simulation</b>	
Running scripts on specific entities (11737)	During a simulation, executing a script for an entity that starts with a number (e.g., 2 Collection Points) causes an error.
